

## ***Osteopathic Medicine for All: CME/GME***

**September 23 – 24, 2022**

**Friday: 10a-4p and Saturday: 8:30a-3:30p**

**Ohio University Heritage College of Osteopathic Medicine  
Cleveland and Dublin, OH Campuses**

### **Course Description**

This hybrid, pre-study, and live course is designed for DO and MD residents and medical education faculty and preceptors in Osteopathic Recognized programs. Participants will gain knowledge to better integrate OMM/OPP into their training and improve skills in precepting and evaluating students in applying those skills. Participants will watch pre-recorded lectures & take post-tests *prior to* attending the live OMM lab sessions. This is an excellent faculty development opportunity and will allow participants to share their learning experiences with each other. .

#### **Participants will learn:**

- Osteopathic Philosophy and History
  - Osteopathic Medical Practice
  - Fundamentals of Structural Diagnosis
  - Fundamentals of Osteopathic Manipulative Treatment
  - Treating Common Problems Osteopathically
- Through a variety of presentations and demonstrations participants will learn, practice, and strengthen their OMM skills and improve their understanding of osteopathic principles and practices (OPP).
- The course will teach participants to increase the utilization of OMM/OPP in resident clinics.
- Participants will improve their skills of precepting students in OMM/OPP.
- Participants who complete the program will be better able to integrate OMM into their training along with precepting and evaluating students in applying those skills.
- Those experienced in OMM will have the opportunity to refine their skills and increase utilization along with the benefit of group discussion re: difficulties in practice or precepting.

**Registration online at:** <https://commerce.cashnet.com/CORE>

A registration confirmation will be emailed to participants upon receipt and processing.

**Course Registration Deadline: *September 12, 2022***

**NOTE:** Completion of pre-study materials and attendance commitment for both days of course is required.

## OMM Labs:

Course presenters will teach the live OMM Labs. They will cover the techniques discussed in the pre-study lectures. Participants will practice OMM techniques on each other.

*NOTE:* PPE and Social Distancing practices will be required as directed by OUHCOM guidelines at the time of the course.

### **Course requirement:**

To prepare for the live course, participants will receive an **OhioHealth CloudCME** link to **approx. 9 hours** of recorded lectures and post-tests in their Course Confirmation email. **Pre-study work must be completed prior to attending the course.**

CME credit will be given upon completion of the pre-study materials. Additional CME credit will be given for attending the live portion of the course.

**CME Accreditation information through OhioHealth will be forthcoming.**
